

A Spooky Good SAREX

Article and Photos By 1Lt LuWana DePorter

There was another SAREX on the 26th of October 2020 and part of the mission was to get some senior members their Scanner rating. Hopefully these photos can give you a little idea what it is like flying in the CAP 182T. In the meantime on the ground, other instruction was going on like communications, tracking weather and also helping out the WYDOT with traffic control as they did their trunk or treat. All in all a very fulfilling day.
